

# Grant Thornton Georgia expands advisory services with new offerings

Grant Thornton Georgia is excited to announce the expanding of its Advisory Department with a newly formed team that brings innovation and expertise to a broad range of services. This fresh approach strengthens our commitment to delivering tailored, high-impact solutions that meet the evolving needs of businesses across industries.

Our Advisory Team is designed to provide clients with specialized services that address the complexities of today's business environment. Below is an overview of the core service areas the team will focus on:

## Business Transformation

With deep expertise in operating model design, merger integration enablement, change management and digital enablement, our team helps businesses rethink and reshape their strategy, organisational structure, systems and processes. By aligning these elements, we ensure companies can adapt to market shifts, enhancing their ability to respond and innovate.

## Human Capital

A thriving workforce is at the core of every successful business. Our Human Capital services encompass talent and performance management, people strategy, HR policies, and skills assessment. We guide organizations in building people-focused frameworks that foster engagement, boost productivity, and support long-term talent development.

## Data Analytics

In a data-driven world, actionable insights are a game-changer. We help organizations leverage data analytics to drive strategic, informed decisions. Our data services span enterprise data management, analytics, and reconciliation, allowing businesses to gain a comprehensive view of operations and customer behaviors to maximize decision-making and growth.

## Valuation

Valuation is essential for companies to understand the true financial worth of their assets, business, or equity stakes, enabling informed decision-making in areas such as mergers, acquisitions, financial reporting, and strategic planning. Our company offers expert valuation services for movable and immovable assets, as well as comprehensive business valuations, and we specialize in Fairness Opinions to ensure objective, equitable insights for critical transactions.

## Financial Management

Strong financial management practices are essential for maintaining organizational stability, optimizing resource allocation, and supporting sustainable growth. We drive effective financial governance and informed decision-making by enhancing core financial processes, including budgeting, forecasting, cash flow management, and financial risk assessment, to foster successful business practices.

## Due Diligence

Due diligence is crucial for making informed, secure business decisions by uncovering risks, verifying assets, and supporting fair valuations. Our services include asset integrity, cash flow accuracy, liabilities assessment, internal controls and third-party partnerships, along with client integrity checks.

## Technology

Technology investments must be strategic, effective, and aligned with business goals. Our technology advisory includes business intelligence, optimizing technology investments, and data management, enabling companies to streamline processes and capitalize on their technology assets for competitive advantage.

## Programme Management

Effective project execution is crucial for achieving strategic objectives. Our programme management services provide end-to-end project mobilization, consulting, and stakeholder engagement, ensuring that organizations can manage complex projects and realize their goals on time and within budget.

## Operations Improvement

Our operations improvement services cover process and performance enhancements, operating model transformations and the integration of people, processes, and technology. We work with organizations to identify inefficiencies, implement best practices, and create streamlined processes that support sustainable productivity and profitability.

## Research and Strategy

Understanding the landscape is essential for making informed, impactful decisions. We offer extensive research and strategy services, including feasibility studies, market and economic impact analysis, sustainability assessments and customer experience strategy.

## Environmental, Social and Governance (ESG)

Our ESG advisory services guide businesses in addressing critical environmental and social challenges, ensuring they remain accountable to stakeholders and aligned with regulatory and ethical standards. This commitment enhances reputation, mitigates risks, and ensures long-term viability.

## Mergers and Acquisitions (M&A)

Navigating M&A requires careful planning and expert guidance. Our M&A services cover every phase, from strategy and valuation to post-merger integration. We help clients execute transactions that create value, ensuring seamless integration and strategic alignment.

## Business Risk Services (BRS)

In today's market, with escalating regulatory demands, rapid technological advancements and heightened cyber threats, businesses require robust support to protect their assets, ensure operational continuity and drive sustainable growth. Our BRS line offers comprehensive solutions in risk management, IT governance and corporate governance advisory, specifically designed to strengthen organizational resilience and uphold regulatory compliance.

The expanded services offered by the Grant Thornton Georgia's Advisory Department reflect our dedication to staying at the forefront of industry trends and addressing the unique challenges faced by our clients.

By leveraging this comprehensive range of services, our clients can expect solutions that are both innovative and practical, driving long-term success and growth.
