We're proud to announce another milestone for our company - Moore Abc

Great News! Moore Abc has received **ISO 9001:2015** (Quality Management Systems) certificate in accounting and financial reporting services. It is influential as we are looking for improvements so we will be able to perform and reinforce service quality to our clients.

ISO 9001 is the standard defining requirements that must be met or exceeded by a company's quality management system.

ISO 9001:2015 certification measures our QMS drives that outline 3 key principles of ISO 9001:

1. **Risk-based thinking** - triggering the process of making improvements before problems occur to prevent issues from happening.
2. **A continuous improvement mindset** - plan, do, check, and act (PDCA).
3. **The cost of poor quality (COPQ)** - true quality is about risk prevention – designing in quality – and not corrective action.

By executing these 3 fundamental ISO principles, we are putting our business on a different, prosperous route, that keeps pace with ongoing innovations and challenges.

We can proudly state that Moore Abc grows with quality in mind. Investment in the ISO certification was made to innovate with certainty and deliver fundamental benefits for our clients and partners.
